

## Creating a contact form using tkinter

---

Write a Python program using tkinter for creating a contact form.

Output:

The image shows a Tkinter window titled "Contact Form". Inside the window, there are three labels: "Name:", "Email:", and "Message:". Each label is followed by a text input field. The "Message:" label is followed by a larger text area. Below these input fields is a "Submit" button. The window has a standard title bar with minimize, maximize, and close buttons.

Copy the code in a document, save it and upload.
